👤 A LITTLE BIT ABOUT ME

I'm a 22 year old graphic designer and illustrator based in Irvine, California. As an artist, I try to produce work that is grounded in aesthetics, harmony, and simplicity. I am drawn to and inspired by both traditional and innovative styles in graphic arts, and its ability to take on many different forms of aesthetic beauty. With the advancement of technology and consequently the expansion of artistic abilities, I believe that the nature of my work lies in the harmony of elements within design. I am passionate in design because of it's ability to visually deliver a message between the creator and audience. My art exists as a bridge between concept and message; I create work that is viewed not with complexity, but with a simplistic beauty that can push boundaries.
